

Arrays

Was gibt das Programm aus?

```
public class Main {  
    public static void main(String[] args) {  
        int[] a = { 3, 7, 5, 9, 6, 2, 8 };  
        Out.print(a.length);  
        Out.print(a[a[4]]);  
    }  
}
```

Antwort

- (1) 68
- (2) 78
- (3) 88
- (4) 6ArrayIndexOutOfBoundsException
- (5) 7ArrayIndexOutOfBoundsException
- (6) 8ArrayIndexOutOfBoundsException

Arrays

Was gibt das Programm aus?

```
public class Main {  
    public static void main(String[] args) {  
        int[] a = { 3, 7, 5, 9, 6, 2, 8 };  
        Out.print(a.length);  
        Out.print(a[a[4]]);  
    }  
}
```

a.length == 7

a[4] == 5th element == 6

→

a[6] == 7th element == 8

Arrays

Was gibt das Programm aus?

```
public class Main {  
    public static void main(String[] args) {  
        int[] a = { 3, 7, 5, 9, 6, 2, 8 };  
        Out.print(a.length);  
        Out.print(a[a[4]]);  
    }  
}
```

Antwort

- (1) 68
- (2) 78 
- (3) 88
- (4) 6ArrayIndexOutOfBounds
- (5) 7ArrayIndexOutOfBounds
- (6) 8ArrayIndexOutOfBounds
