

Ausdruckswert

Was gibt das Programm aus?

```
public class Ausdruckswert {  
    public static void main(String[] args) {  
        int i = 4;  
        int j = ++i;  
        i += j++;  
        System.out.println(i * j); // ?  
    }  
}
```

Antwort

- (1) 16
- (2) 20
- (3) 30
- (4) 50
- (5) 60
- (6) 66
- (7) 80
- (8) 120

Ausdruckswert

Was gibt das Programm aus?

```
public class Ausdruckswert {  
    public static void main(String[] args) {  
        int i = 4;  
        int j = ++i;  
        i += j++;  
        System.out.println(i * j);  
    }  
}
```

i = 4

i = i + 1, j = i
→ i = 5, j = 5

i = i + j, j = j + 1
→ i = 10, j = 6

Ausdruckswert

Was gibt das Programm aus?

```
public class Ausdruckswert {  
    public static void main(String[] args) {  
        int i = 4;  
        int j = ++i;  
        i += j++;  
        System.out.println(i * j); // ?  
    }  
}
```
